SUMMARY

Frontend Developer with 2+ years of experience building responsive, scalable, and high-performance web applications using React.js, Next.js, JavaScript (ES6+), and TypeScript. Experienced in developing reusable UI components, integrating REST APIs and third-party services, and implementing modern state management solutions including Redux Toolkit, Context API, Zustand, and React Query. Strong expertise in Tailwind CSS, Material UI, SASS/SCSS, responsive design, cross-browser compatibility, and application performance optimization. Proven ability to collaborate with designers and backend developers, troubleshoot complex frontend issues, and deliver user-friendly web applications following industry best practices and coding standards.

EXPERIENCE

Senior Frontend Developer

Zoonest Technologies Pvt Ltd

Apr. 2025 – Present

Trichy, Tamil Nadu

- Built reusable and scalable UI components using React.js, TypeScript, Tailwind CSS, and Material UI, improving development productivity by 35%
- Implemented advanced state management using Redux Toolkit, Context API, Zustand, and React Query for efficient client-side data handling
- Integrated REST APIs and third-party services while implementing error handling, caching strategies, and optimized data fetching
- Developed AI-powered web applications by integrating LLM APIs and real-time AI services, enabling intelligent user interactions and workflow automation
- Contributed to real-time Voice AI solutions by integrating speech-to-text, text-to-speech, and conversational AI APIs to automate voice-based interactions with low latency
- Optimized application performance through code splitting, lazy loading, memoization, and bundle optimization, reducing page load times by 40%
- Collaborated closely with UI/UX designers, AI engineers, and backend developers to deliver responsive, user-friendly, and AI-enabled web applications
- Troubleshoot and resolved frontend issues across multiple browsers and devices, improving application stability and user experience

Frontend Developer

Zoonest Technologies Pvt Ltd

Apr. 2024 – Apr. 2025

Trichy, Tamilnadu

- Designed and coded **responsive, interactive web pages** using **HTML5, CSS3, and JavaScript (ES6+)**; applied **CSS3 animations, transitions, and Flexbox/Grid layouts** to deliver engaging, modern user interfaces
- Used **React.js as the primary state management and UI library** to build modular, maintainable components; applied hooks and Redux Toolkit for predictable **state management** across complex application flows
- Collaborated with the **backend team** to integrate frontend views with **server-side APIs**, coordinating on JSON data structures and implementing error handling, retry logic, and loading state management
- Built and maintained **reusable UI components and libraries** following DRY principles; documented component APIs and usage guidelines, enabling adoption by **3+ cross-functional teams**
- Configured **Webpack** build tooling for development and production environments; resolved module resolution conflicts and optimized asset delivery pipelines, improving production build times by **~25%**
- Ensured **cross-browser compatibility and responsiveness** across all major browsers and device sizes; used browser DevTools to debug layout issues, CSS specificity conflicts, and JavaScript runtime errors
- Participated in **code reviews** and **collaborative team workflows**, contributing to pull request discussions and helping enforce consistent **JavaScript (ES6+), HTML5, and CSS3** coding standards via **ESLint** and **Git**

SKILLS

Frontend Frameworks: React.js, Next.js, Angular (Basic), Vue.js (Basic), React Native

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

State Management: Redux Toolkit, Context API, Zustand, React Query

UI Libraries: Tailwind CSS, Material UI, Bootstrap, NativeWind

Styling: CSS3, SASS/SCSS, Flexbox, CSS Grid, Responsive Design, Mobile-First Design

API Integration: REST APIs, Axios, Fetch API, Third-Party APIs, WebSocket APIs

Build Tools: Webpack, Rollup, Vite, Babel, NPM, Yarn

Version Control: Git, GitHub, GitLab, Pull Requests, Code Reviews

Testing & Debugging: React Testing Library, Jest, Browser DevTools, Debugging, Performance Optimization

Development Practices: Reusable Components, Cross-Browser Compatibility, Scalability, Agile, Coding Standards

PROJECTS

Coffee Shop E-Commerce & Reservation Platform

[View Demo](#) 

- Designed and developed a **responsive, interactive web application** using **HTML5, CSS3, and JavaScript (ES6+)** with **React.js** as the UI and **state management library**; ensured **cross-browser compatibility** across all major browsers and device sizes
- Developed and maintained **reusable UI components** for product cards, cart, filters, and checkout; **collaborated with the backend team** to integrate frontend views with **server-side REST APIs** using Axios
- Configured **Webpack** build tooling for production optimization and **Rollup** for component library bundling; applied **ESLint** standards and participated in **code review** workflows using **Git**

Turf Booking Web Application

[View Demo](#) 

- Designed and built **responsive, interactive web pages** using **HTML5, CSS3 Flexbox/Grid, and JavaScript (ES6+)**; implemented **mobile-first layouts** ensuring full responsiveness across desktop, tablet, and mobile viewports
- Developed **reusable UI form components and libraries** with **React.js**; **collaborated with the backend team** to integrate booking and payment APIs; used **Webpack** build tooling with code splitting to cut load time by **~35%**

Bike Rental Admin Mobile Application

[View Demo](#) 

- Built a cross-platform **React Native** application using **JavaScript (ES6+)** and **CSS-in-JS styling**; developed **reusable UI component libraries** for admin dashboards, enforcing **code quality** through **Git-based** code review workflows
- **Collaborated with the backend team** to integrate **server-side REST APIs** (Node.js, Express.js, MongoDB); ensured **cross-browser and cross-platform compatibility** across Android and iOS environments

QuizCraft AI – AI-Powered Quiz Creation Platform

[View Demo](#) 

- Built a scalable **full-stack quiz platform** using **Next.js, Supabase, and Tailwind CSS**, enabling users to create quizzes through both **AI-assisted** and manual workflows
- Integrated **Supabase Authentication**, real-time database, and storage services to support secure user management, persistent quiz data, and **unique shareable quiz URLs**
- Designed and implemented an **admin analytics dashboard** for quiz lifecycle management, participant response tracking, score evaluation, and performance insights while maintaining reusable, responsive UI components

EDUCATION

B.Tech

College of Food and Dairy Technology, Chennai

Dec 2020

- **CGPA: 7.71**
